National Museum of Science, Technology & Space

Technion Entrepreneurial Incubator Company

Index

In 1924, Technion – Israel's first university – opened its doors and prepared young men and women to build the modern state. Today, Technion is a world-class center of advanced research and learning in engineering, science, medicine, architecture, education, and management. It is Israel's premier scientific-technological research university. Technion graduates are a vital source of Israel's industrial development, economic growth and national security.

Situated on the scenic Carmel Mountain, Technion overlooks the Haifa Bay and Lower Galilee.

Visiting academics, international conferences and overseas graduate students create a cosmopolitan atmosphere on campus.
